## THEY WOULD STARVE

The Fate of Germany If Imported  
 Foodstuffs Were Cut Off.

Consul General Mason at Berlin Makes  
 Interesting Report on the Sub-  
 ject to the State Depart-  
 ment.

Debate which has been in progress  
 in the German reichstag over the pro-  
 posed meat inspection act, which if  
 passed would practically stop all im-  
 portation of live cattle and meats into  
 Germany, has again revived the ques-  
 tion of what would the industrial and  
 commercial classes of Germany do for  
 food if the imported supply of bread-  
 stuffs and meats should be cut off?

Consul General Mason at Berlin has  
 made an interesting report upon this  
 subject to the state department. Dur-  
 ing the past century, he says, the popu-  
 lation of the German empire has in-  
 creased from 20,000,000 to 55,000,000 and  
 a proportionate increase would indi-  
 cate nearly 100,000,000 persons in Ger-  
 many at the close of the twentieth cen-  
 tury. Farm, dairy and garden produc-  
 tion does not keep pace by any means  
 with the steady increase of population,  
 and only by diverting the capital and  
 labor which now furthers commerce  
 and trade in Germany to the farms and  
 fields, can the future food supply of  
 the country be assured. But the task  
 of turning back the young men of  
 the rural districts who have migrated  
 to the cities and caught the fever  
 of trade and traffic, to the dullness of  
 farm life, would be a difficult one in-  
 deed, as would also be that of attract-  
 ing to agricultural pursuits the cap-  
 ital that now earns such abundant prof-  
 its from industry and trade. In conclu-  
 sion the consul states that the legisla-  
 tion enacted this year in regard to the  
 increase of the food supply will have  
 a potent influence in shaping the eco-  
 nomic history of Germany for years to  
 come.

## AIRSHIP LINE TO EUROPE.

A New Company Formed to Promote  
 New Means of Transpor-  
 tation.

The Custard Airship company filed  
 its charter in the secretary of state's  
 office at Austin, Tex., the other day. It  
 has a capital stock of \$100,000 and pro-  
 poses to manufacture airships and es-  
 tablish airship lines between all the  
 principal cities of the United States  
 and between New York city and Eu-  
 rope.

The airship which the company pro-  
 poses to manufacture and operate is  
 on plans invented by W. D. Custard, a  
 railroad agent of Elm Mott, Tex. Mr.  
 Custard has been working on this in-  
 vention for six years, and he recently  
 completed an airship that was given a  
 practical test two weeks ago at Elm  
 Mott. This test was witnessed by all  
 the stockholders of the company after-  
 ward organized and was pronounced  
 successful in every respect.

The airships will be operated by a  
 compressed carbonic acid gas motor  
 and will have a maximum speed of 125  
 miles an hour. The first of the ships to  
 be manufactured by the company will  
 be completed about July 20. Mr.  
 Custard and a party of friends propose  
 to sail in it to New York and thence  
 across the Atlantic to Paris. They ex-  
 pect to reach Paris about August 1 and  
 exhibit the airship at the Paris exposi-  
 tion.

## CURIOUS DOCUMENT FOUND.

Author of "Home Sweet Home" Ac-  
 ted as Land Agent While  
 in Europe.

The University of Chicago received  
 the other day a curious old document  
 which is a relic of the early history of  
 Tennessee. P. B. Mayfield, a lawyer  
 in Cleveland, Tenn., was asked recently  
 to look over some old papers of Thomas  
 H. Calloway, of that place, and in his  
 search found a document signed by  
 Calloway and John Howard Payne, the  
 writer of "Home, Sweet Home." The  
 paper was signed in 1842, and the wit-  
 ness was Samuel Colt, the inventor of  
 the famous Colt's revolver.

The document shows that a man  
 who was at that time American consul  
 to Tunis, was to receive one-fifth of  
 the profits made by a certain parcel  
 of land which he was to sell in Eng-  
 land, Germany and other European  
 countries. The land was the Overland  
 district, which was ceded to the United  
 States by the Cherokee Indians in 1835,  
 and in turn given to the state of Ten-  
 nessee by the government. The state  
 of Tennessee gave out the land in  
 grants, and Calloway received the  
 major portion of it for services ren-  
 dered. In the same document Payne  
 was also given power of attorney on  
 142,500 acres of the land.

The university authorities will place  
 the document in the museum.

## SCIENCE AND INDUSTRY.

Electricity has just been applied to  
 the making of cigarettes and cut to-  
 bacco, and hundreds of hand workers  
 will eventually be displaced by the  
 innovation.

South Carolina is now manufactur-  
 ing all the cotton she produces. North  
 Carolina, Georgia and other southern  
 states are also turning out a large  
 part of their cotton in finished goods.  
 To-day there are a dozen large mills  
 and 175 lace-making machines in the  
 United States. These machines rep-  
 resent an invested capital of nearly  
 \$30,000,000, and turn out annually  
 4,500,000 pairs of curtains, valued at  
 \$2,000,000.

One of the largest works of man's  
 hands is the artificial lake, or reser-  
 voir, in India, at Rajpootana. This  
 reservoir, said to be the largest in  
 the world, and known as the great  
 tank of Diabar, and used for irrigat-  
 ing purposes, covers an area of 21  
 square miles.
